Summary

JavaScript & Golang Developer

With over 10 years of programming experience in both nonprofit & commercial startups dealing with high-load & high-demand tasks, Alexandr is keen on pivoting their career towards penetration testing and cyber security.

Ethical Hacker

After a great journey as a self-taught software developer, Alexandr decided to pivot their career towards cyber security and penetration testing. Attending University and becoming a certified bug bounty hunter are Alexandr's first milestones in this field.

Privacy Enthusiast

Alexandr's passion is world where people have total privacy. In an attempt to pursue this goal, Alexandr joined several startups and delivered solutions that enhanced privacy of the users by utilizing both Tor and P2P networking.

Blockchain Expert

After joining the crypto scene back in 2016, Alexandr pursued their passion in both spreading and creating educational content related to blockchain technologies. Alexandr has experience in embedding blockchain solutions into emerging and running businesses. Special speaker at multiple community and commercial based blockchain conferences.
